HIPAA Notice of Privacy Practices

This notice describes how medical information about you may be used and disclosed and how you can get access to this information. Please review it carefully. The effective date of this notice is 10/24/2023 and will remain in effect until it is amended or replaced by us.

Your Rights

When it comes to your health information, you have certain rights. This section explains your rights and some of our responsibilities to help you.

Get a copy of health and claims records:

- You can ask to see or get a copy of your health and claims records and other health information we have about you. Ask us how to do this.
- We will provide a copy or a summary of your health and claims records, usually within 30 days of your request. We may charge a reasonable, cost-based fee.

Ask us to correct health and claims records:

- You can ask us to correct your health and claims records if you think they are incorrect or incomplete. Ask us how to do this. We may say "no" to your request, but we'll tell you why in writing within 60 days.

Request confidential communications:

- You can ask us to contact you in a specific way (for example, home or office phone) or to send mail to a different address. We will consider all reasonable requests and must say "yes" if you tell us, you would be in danger if we do not.

Ask us to limit what we use or share:

- You can ask us not to use or share certain health information for treatment, payment, or our operations. We are not required to agree to your request, and we may say "no" if it would affect your care.

Get a list of those with whom we've shared information:

- You can ask for a list (accounting) of the times we've shared your health information for six years prior to the date you ask, who we shared it with, and why.
- We will include all the disclosures except for those about treatment, payment, and health care operations, and certain other disclosures (such as any you asked us to make). We'll provide one accounting a year for free but will charge a reasonable, cost-based fee if you ask for another one within 12 months.

Get a copy of this privacy notice:

- You can ask for a paper copy of this notice at any time, even if you have agreed to receive the notice electronically. We will provide you with a paper copy promptly.

Choose someone to act for you:

- If you have given someone medical power of attorney or if someone is your legal guardian, that person can exercise your rights and make choices about your health information.
- We will make sure the person has this authority and can act for you before we take any action.

File a complaint if you feel your rights are violated:

- You can complain if you feel we have violated your rights by contacting us using the information on page 1. • You can file a complaint with the U.S. Department of Health and Human Services Office for Civil Rights by sending a letter to 200 Independence Avenue, S.W., Washington, D.C. 20201, calling 1-877-696-6775, or visiting

  www.hhs.gov/ocr/privacy/hipaa/complaints/.
- We will not retaliate against you for filing a complaint.

Your Choices

For certain health information, you can tell us your choices about what we share. If you have a clear preference for how we share your information in the situations described below, talk to us. **Tell us what you want us to do, and we will follow your instructions.** In these cases, you have both the right and choice to tell us to:

- Share information with your family, close friends, or others involved in payment for your care
- Share information in a disaster relief situation.

If you are not able to tell us your preference, for example if you are unconscious, we may go ahead and share your information if we believe it is in your best interest. We may also share your information when needed to lessen a serious and imminent threat to health or safety.

In these cases, we ***never*** share your information unless you give us written permission:

- Marketing purposes
- Sale of your information

PHYSICIAN/PATIENT INFORMED CONSENT AND AGREEMENT FOR LONG-TERM OPIOID/NARCOTIC THERAPY FOR TREATMENT OF CHRONIC PAIN

PATIENT NAME: _____DOB: _____

You have agreed to or may potentially receive opioid/narcotic therapy for the treatment of chronic pain. You understand that these drugs are very useful but have a potential for misuse and are therefore closely controlled by local, state, and Federal governments. The goal of this treatment is to: (a) reduce your pain; and (b) improve your level of function in performing your activities of daily living. Our goal is to not initiate or continue opioid therapy whenever possible, but sometimes this may be warranted for more effective pain management. Alternative therapies and medications have been explained and offered to you. You have chosen opioid/narcotic therapy as one component of treatment.

The use of cigarettes demonstrates a dependence on nicotine. This complicates opioid therapy. If you are a smoker, you have agreed to a smoking cessation program.

You must be aware of the potential side effects and risks of these medications. They are explained below. If you have any questions or concerns during your treatment, you should contact your physician.

If you choose to use these medications, then you must read, understand, agree to, and sign this Agreement. The Agreement will be in effect until: you ask in writing for the agreement to end, your physician, nurse Practitioner, physician assistant (provider) ends the Agreement, and/or you are formally discharged from Dr. G Pain & Orthopedics.

SIDE EFFECTS

Side effects are normal physical reactions to medications. Common side effects of opioids/narcotics include mood changes, drowsiness, dizziness, constipation, nausea, and confusion. Many of these side effects will resolve over days or weeks. Constipation often persists and may require additional medication. If other side effects persist, different opioids may be tried or they may be discontinued. You should NOT:

a. operate a vehicle or machinery if the medication makes you drowsy.
b. consume ANY alcohol while taking opioids/narcotics; or
c. take any other non-prescribed sedative medication while taking opioids/narcotics.

The effects of alcohol and sedatives are additive with those of opioids/narcotics. If you take these substances in combination with opioids/narcotics, a dangerous situation could result, such as a coma, organ damage or even death. Driving while taking opioids for chronic pain is considered medically acceptable as long as you do not have side effects such as sedation or altered mental status. These side effects usually do not occur while taking opioids/narcotics chronically. However, it is possible that you could be considered DUI if stopped by law enforcement while driving.

Opioid medications have been shown to increase the risk of poor surgical outcomes, increase the risk of motor vehicle Collisions, increase the risk of impotence and sexual difficulties, and increase the risk of heart attacks (myocardial infarction), bone fractures, addiction, and death.

Constipation is a well-known side effect of opioid therapy and can usually be treated with stool softeners or gentle laxatives. Constipation is a side effect that usually does not go away and requires treatment.

PATIENT'S INITIALS: _____

PATIENT NAME: _____ DOB: _____

RISKS:

DEPENDENCE

Physical dependence is an expected side effect of long-term opioid/narcotic therapy. This means that if you take opioids/narcotics continuously, and then stop them abruptly, you will experience withdrawal syndrome. This syndrome often includes sweating, diarrhea, irritability, sleeplessness, runny nose, tearing, muscle and bone aching, gooseflesh, and dilated pupils. Withdrawal can be life threatening. To prevent these symptoms, the opioid/narcotics should be taken regularly or, if discontinued, reduced gradually under the supervision of your physician.

TOLERANCE

Tolerance to the pain-relieving effect of opioids/narcotics is possible with continued use. This means that more medication is required to achieve the same level of pain control experienced when the opioid/narcotic therapy was initiated. This may occur even though there has been no change in your underlying painful condition. When tolerance does occur, sometimes it requires tapering or discontinuation of the opioid/narcotic. Sometimes tolerance can be treated by substituting a different opioid/narcotic. When initiated, doses of medications must be adjusted to achieve a therapeutic, pain-relieving effect upward adjustments during this period are not viewed as tolerance.

INCREASED PAIN (Hyperalgesia)

The long-term effects of opioids/narcotics on the body's own pain-fighting systems are unknown. Some evidence suggests that opioids/narcotics may interfere with pain modulation, resulting in an increased sensitivity to pain. Sometimes individuals who have been on long-term opioids/narcotics, but who continue to have pain, actually note decreased pain after several weeks off the medications.

ADDICTION

Addiction is a primary, chronic, neurological disease, with genetic, psychosocial, and environmental factors influencing the development and manifestations. It is characterized by behaviors that include one or more of the following: •Impaired control over drug use;

- Compulsive use;
- Continued use despite harm; and/or
- Craving.

Most patients with chronic pain who use long-term opioids/narcotics are able to take medications on a scheduled basis as prescribed, do not seek other drugs when their pain is controlled, and experience improvement in their quality of life as the result of opioid therapy. Therefore, they are NOT addicted. Physical dependence is NOT the same as addiction.

RISK TO UNBORN CHILDREN:

Children born to women who are taking opioids/narcotics on a regular basis will likely be physically dependent at birth. Women of childbearing age should maintain safe and effective birth control while on opioid/narcotic therapy. Should you become pregnant, immediately contact your physician and the medication will be tapered and stopped.

LONG-TERM SIDE EFFECTS:

The long-term effect of opioid/narcotic therapy is not fully known. Most of the long-term effects have been listed above. If you have additional questions regarding the potential long-term effects of opioid/narcotic therapy, please speak with your physician.

PATIENT'S INITIALS: _____

PATIENT NAME: _____DOB: _____

PRESCRIPTIONS AND USE OF OPIOID/NARCOTIC MEDICATIONS

o Your medication will be prescribed by your physician for control of pain. Based on your individual needs, you will be provided with enough medication monthly, two-month basis, or three-month basis. New injuries or pain problems will require reevaluation. Prescriptions for opioids/narcotics will not be "called in" to the pharmacy.

o You agree that you must be seen by your physician at a minimum of every three months during the course of your therapy.

o You agree and understand that increasing your dose without the close supervision of your physician could lead to drug overdose, causing severe sedation, respiratory depression and/or death.

o You agree and understand that opioid/narcotic medication is strictly prescribed for you, and your opioid/narcotic medication should NEVER be given to others.

o You agree to fill opioid/narcotic prescriptions at one pharmacy.

o You agree to secure your opioid/narcotic medications in a safe, locked source to prevent loss or theft. You are responsible for any loss of theft.

o You agree that lost, stolen, or destroyed prescriptions or drugs will **not be replaced**, and may result in discontinuation of treatment.

o You agree to obtain opioid/narcotic medication from one prescribing physician or that physician's substitute if your prescribing physician is not available and your prescribing physician has authorized his or her substitute to provide treatment.

o You agree to submit to an initial examination and evaluation, to routine examination and evaluation on a monthly basis or regular basis (but no less than once every three months), and to examination and evaluation at the direction of your physician.

o You agree to submit to blood and/or urine testing to monitor the levels of medication or other drugs and any organ side effects. You also agree that other doctors and law enforcement may be notified of the results.

o You agree NOT to call the physician for refills or replacement medications during evening hours or on weekends/holidays. Medication refill and/or replacement requests will be addressed during regular business hours only.

o You understand and agree that if you lose your medication or run out early due to overuse, you may experience and go through withdrawal from opioids/narcotics. You further understand and agree that you are solely responsible for your own medications.

o You agree to bring all prescription medications in their bottles or containers to the office during regularly scheduled visits.

o You agree to provide a list from your pharmacy detailing all medications received from that pharmacy and to provide updated lists as requested by your physician.

o For patients taking methadone: Methadone has significant interactions with many other medications. Some of these medications may reduce your body's ability to metabolize methadone, thus INCREASING the methadone in your body, which could be dangerous. Therefore, you MUST notify this office of ALL Medications prescribed for ANY condition while taking methadone.

Consent to Obtain Medication History

Our medical practice has adopted an electronic medical record system to improve the quality of our services. This system also allows us to collect and review your "medication history." A medication history is a list of prescription medicines that we or other doctors have recently prescribed for you. This list is collected from a variety of sources, including your pharmacy and your health insurer.

An accurate medication history is important in helping us treat you properly and avoiding potentially dangerous drug interactions.

By signing this consent form you give us permission to collect and give your pharmacy and your health plan permission to disclose information about your prescriptions that have been filled at any pharmacy or covered by any health insurance plan. This includes prescription medicines to treat AIDS/HIV and medicines used to treat mental health conditions, such as depression. This information will become part of your medical record.

This medication history is a useful guide, but it may not be completely accurate. Some pharmacies do not make drug histories available to us, and the drug history from your Health plan might not include drugs that you purchased without using your health insurance. Your medication history might not include over-the-counter medicines, supplements, or herbal remedies. It is still important for us to take the time to discuss everything you are taking, and for you to point out to us any errors in your medication history.

I give permission for you to obtain my medication history from my pharmacy, my health plan(s) and my other healthcare providers.
